

VIDEO TRANSCRIPT: “Long-term development dual runways” ANIMATION

Time	Visual	Voiceover
00:00	The 3D orbit continues.	At twice the land size of the existing Sydney Airport, a Western Sydney Airport will grow with demand.
00:06	The 3D orbit continues. A caption flashes on screen which reads “10 million passengers a year around 2030”.	As passenger numbers grow, the terminal and airport facilities will expand
00:16	The 3D orbit continues. A caption reads “37 million passengers a year around 2050”, then changes to “82 million passengers a year around 2063”. The 3D graphic transitions from the Stage 1 development with one runway and a smaller terminal, to the long-term development with two runways and a larger terminal.	and by 2050 a second runway would need to be built. The airport will provide thousands of jobs and attract a range of industries and businesses to the surrounding area.
